Silverplated Flatware, An Identification and Value Guide ...

The difference between silver and plated silver is a matter of value. Plated silver means that the object has a very thin coat of silver applied. This type of silver has little value, with the silver coating generally wearing off the item in under 20 years time.

How to Identify Silver Vs. Silver Plate | Our Pastimes

The first thing you need to evaluate is the type of silver used on the item. There are two types of silver that you will find on antique flatware: silver plate and sterling silver. Silver plate was made with a silver coating on top of a different base metal; this method was typically used to provide a silver appearance at a lower cost.

A Guide to Help You Evaluate Antique Sterling Silver Flatware

Jewelry, flatware, and hollowware are the most common silver plated items. On the other hand, sterling silver is a combination of 92.5% pure silver and 7.5% additives. The

Online Library Silverplated Flatware An Identification And Value Guide 4th Revised

most common additives used are nickel and copper, or a combination of different kinds of metals (an alloy), which helps make the item more durable and more resistant to discoloration and oxidation.
